History of the Italian Agricultural Landscape
Jan 28 2021 Emilio Sereni's classic work is now available in an English language edition. *History of the Italian Agricultural Landscape* is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes

attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. *History of the Italian Agricultural Landscape* first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

AMBIENTOPOLI Dec 19 2022 E' comodo definirsi scrittori da parte di chi non ha arte né parte. I letterati, che non siano poeti, cioè scrittori stringati, si dividono in narratori e saggisti. E' facile scrivere "C'era una volta..." e parlare di cazzate con nomi di fantasia. In questo modo il successo è assicurato e non hai rompiballe che si sentono diffamati e che ti querelano e che, spesso, sono gli stessi che ti condannano. Meno facile è essere saggisti e scrivere "C'è adesso..." e parlare di cose reali con nomi e cognomi. illusions and delusions pursued in the face of warnings that the pursuit of unity was based on weak foundations.

Planning and Conflict Aug 03 2021 Planning and Conflict discusses the reasons for conflicts around urban developments and analyzes their shape in contemporary cities. It offers an interdisciplinary framework for scholars to engage with the issue of planning conflicts, focusing on both empirical and theoretical inquiry. By reviewing different perspectives for planners to engage with conflicts, and not simply mediate or avoid them, Planning and Conflict provides a theoretically informed look forward to the future of engaged, responsive city development that involves all its stakeholders.

King Kirby Nov 13 2019 "Crystal Skillman and Fred Van Lente, the husband-and-wife playwrights behind 'King Kirby, ' know the score. She wrote the smart Off Off Broadway shows "Cut" and the fangirl-friendly 'Geek'; he was a co-author of the graphic novel 'Cowboys & Aliens, ' later adapted for a Hollywood sci-fi western. With this supple, informative and poignant portrait, they offer penetrating insight into the tirelessly prolific Kirby (1917-94), whose brawny and dynamic yet nuanced style dominated comics for more than 40 years. Their play (Kirby was

known as the king) documents a creator who attained immortality even as his life ended amid a morass of corporate exploitation." - Andy Webster, *The New York Times* KING KIRBY is a play by the husband-and-wife team of *New York Times* bestselling comics writer Fred Van Lente and NYIT award-winning playwright Crystal Skillman about the life and times of Jack Kirby, the great comic book artist who created or co-created some of your favorite heroes on the page and screen, Captain America, the Avengers, Thor, Fantastic Four, the X-Men, Iron Man, Young Romance, the New Gods, Darkseid, The Demon... the list goes on and on. From the Jewish ghetto of New York's Lower East Side to the battlefields of France to the Senate hearings of 1950s, this is a hysterical and heartbreaking story about a man who pours his quintessentially Twentieth Century life into his comics, only to make the fateful mistake that sends him into obscurity while his creations become known to every person on Earth. A real-life "Adventures of Kavalier & Klay," King Kirby asks what happens when an artist doesn't own his own legacy? Can he ever get it back?

This important work has included extensive studies, concepts and design developments, with far reaching applications, which have all confirmed the feasibility of this

Globalization and the Decolonial Option Feb 09 2022 This is the first book in English profiling the work of a research collective that evolved around the notion of "coloniality", understood as the hidden agenda and the darker side of modernity and whose members are based in South America and the United States. The project called for an understanding of modernity not from modernity itself but from its darker side, coloniality, and proposes the de-colonization of knowledge as an epistemological restitution with political and ethical implications. Epistemic decolonization, or de-coloniality, becomes the horizon to imagine and act toward global futures in which the notion of a political enemy is replaced by intercultural communication and towards an-other rationality that puts life first and that places institutions at its service, rather than the

other way around. The volume is profoundly inter- and trans-disciplinary, with authors writing from many intellectual, transdisciplinary, and institutional spaces. This book was published as a special issue of Cultural Studies.

The Cute Manifesto May 12 2022 In a dangerously uncertain world, Kochalka plots a theoretical path to happiness. A Getting Things Done manual for cartoonists.

Ecocriticism and the Anthropocene in Nineteenth-Century Art and Visual Culture Jan 16 2020 In this volume, emerging and established scholars bring ethical and political concerns for the environment, nonhuman animals and social justice to the study of nineteenth-century visual culture. They draw their theoretical inspiration from the vitality of emerging critical discourses, such as new materialism, ecofeminism, critical animal studies, food studies, object-oriented ontology and affect theory. This timely volume looks back at the early decades of the Anthropocene to query the agency of visual culture to critique, create and maintain more resilient and biologically diverse local and global ecologies.

Ecological Literacy Mar 10 2022 The most important discoveries of the 20th century exist not in the realm of science, medicine,

or technology, but rather in the dawning awareness of the earth's limits and how those limits will affect human evolution. Humanity has reached a crossroad where various ecological catastrophes meet what some call sustainable development. While a great deal of attention has been given to what governments, corporations, utilities, international agencies, and private citizens can do to help in the transition to sustainability, little thought has been given to what schools, colleges, and universities can do. Ecological Literacy asks how the discovery of finiteness affects the content and substance of education. Given the limits of the earth, what should people know and how should they learn it?

The Bioregional Imagination Aug 15 2022

Bioregionalism is an innovative way of thinking about place and planet from an ecological perspective. Although bioregional ideas occur regularly in ecocritical writing, until now no systematic effort has been made to outline the principles of bioregional literary criticism and to use it as a way to read, write, understand, and teach literature. The twenty-four original essays here are written by an outstanding selection of international scholars. The range of

bioregions covered is global and includes such diverse places as British Columbia's Meldrum Creek and Italy's Po River Valley, the Arctic and the Outback. There are even forays into cyberspace and outer space. In their comprehensive introduction, the editors map the terrain of the bioregional movement, including its history and potential to inspire and invigorate place-based and environmental literary criticism. Responding to bioregional tenets, this volume is divided into four sections. The essays in the "Reinhabiting" section narrate experiments in living-in-place and restoring damaged environments. The "Rereading" essays practice bioregional literary criticism, both by examining texts with strong ties to bioregional paradigms and by opening other, less-obvious texts to bioregional analysis. In "Reimagining," the essays push bioregionalism to evolve—by expanding its corpus of texts, coupling its perspectives with other approaches, or challenging its core constructs. Essays in the "Renewal" section address bioregional pedagogy, beginning with local habitat studies and concluding with musings about the Internet. In response to the environmental crisis, we must reimagine our relationship to the places we inhabit. This volume shows how literature and literary studies are

fundamental tools to such a reimagining.

Geomorphological Hazards of Europe Oct 25 2020 The *Geomorphological Hazards of Europe* contains an excellent balance of authoritative statements on the range and causes of natural hazards in Europe. Written in a clear and unpretentious style, it removes myths and concentrates on the basic facts. The book looks at the known distributions, processes and the underlying principles and focuses on the need for a true understanding of the scientific details so that a real contribution to hazard management can be made. A comprehensive treatment of scientific and management issues of hazards in Europe caused by natural or sometimes human induced earth surface processes are covered including floods, landslides, avalanches, glacier-, coastal-, karstic-, and volcanic hazards, soil erosion and subsidence. Leading researchers in the field of natural hazards and their mitigation have contributed to this nation by nation account covering 20 European countries. The individual chapters deal with the distribution of natural hazards within specific countries (quite often the first synthesis of the information available) and • provide a review of current research in the field • discuss the economic, engineering and policy responses in national hazard management

• are complemented by an extensive bibliography. The volume is well illustrated with 207 figures of which 66 are photos and has an extensive general index and a complete index of place names. It is a major European contribution to the International Decade for Natural Disasters Reduction. The book will appeal to practitioners, managers, academicians, researchers, as well as graduate students in geomorphology, natural hazards research and environmental management.

Kurt Cobain Oct 17 2022 Growing up, Kurt Cobain believed that he was an alien and that his parents weren't really his parents. He thought that his alien race would rescue him sooner or later or that he would at least meet others like him, never feeling alone again. Eventually, Kurt Cobain will meet like-minded friends and start the band, Nirvana, that changes the musical landscape forever. Created by two up-and-coming Italian comic artists, this nonfiction, coming-of-age graphic novel follows Kurt Cobain from his childhood to the brink of worldwide fame with the release of *Nevermind*, showing how tough suburban life can be for a teenager and how friendship and music can fill that emptiness, especially when you feel different. Alone."

Postcolonial Comics Oct 05 2021 This collection examines new comic-book cultures,

graphic writing, and bande dessinée texts as they relate to postcolonialism in contemporary Anglophone and Francophone settings. The individual chapters are framed within a larger enquiry that considers definitive aspects of the postcolonial condition in twenty-first-century (con)texts. The authors demonstrate that the fields of comic-book production and circulation in various regional histories introduce new postcolonial vocabularies, reconstitute conventional "image-functions" in established social texts and political systems, and present competing narratives of resistance and rights. In this sense, postcolonial comic cultures are of particular significance in the context of a newly global and politically recomposed landscape. This volume introduces a timely intervention within current comic-book-area studies that remain firmly situated within the "U.S.-European and Japanese manga paradigms" and their reading publics. It will be of great interest to a wide variety of disciplines including postcolonial studies, comics-area studies, cultural studies, and gender studies.

Psychoanalysis and Management Sep 16 2022 The author is a highly successful consultant to leading institutions and organisations. In this enriching and challenging dialogue with the Italian journalist Oscar Iarussi, he

brings his passion for life and unceasing search for true awareness for all to focus on the innovative principle of transformation. This book talks about transformation in a two-voice encounter resulting in a thought-provoking and rewarding read for laymen and academics alike. The tone of the account is philosophical, whilst being light and dense.

Governments and Parties in Italy Apr 30 2021
This book challenges the traditional approaches to party system analysis and policy space. It offers a survey of the most recent changes in Italian party politics. It puts forward an original comparison of the policy positions of seven Italian coalition governments and of the relative policy positions of the Italian parliamentary parties from 1994 to 2006. That decade was crucial in recent Italian political history because since 1994 the party system in Italy has been going through a process of realignment. After almost 50 years of political immobility, Italian democracy has finally begun to work according to the principle of alternating power between government incumbents and the opposition. Specific methodology was developed for this research, with the political 'themes' articulated by Government and Parliamentary leaders treated as expressions of political preferences. Rather than positioning the

parties on predetermined left-right scales, the 'spaces of competition' were derived directly by the political debates in parliament.

The History of European Liberalism Jun 20 2020

Science and the Decolonization of Social Theory Mar 30 2021 This book addresses the ideological figure of modernity, its presumed historical significance as an era, and its theoretical adequacy as a frame. It shows how science is evoked to prevent the sociological imagination from elaborating non-Eurocentric categories and terminologies that are more adequate for a global age. The idea of modernity should not only be contested, but radically unthought in its foundational assumptions. These assumptions inform concepts such as secularization, emancipation, the 'global' and accumulation of capital. This book frees these concepts from ethnocentrism and discloses a path toward a new, non-Eurocentric, global social theory. Gennaro Ascione explores the transformative potential of decolonizing knowledge through a radical reconsideration of the historical and epistemological role that the intellectual reference to science plays in the construction

of concepts. This ground-breaking work challenges social theorists to think globally beyond modernity, bringing together social theory and science in an unprecedented way. Importantly, it makes accessible a new space of missing theorization for further developments and inquiries in the field.

Inconsciente y emergencia ambiental Jan 20 2023 El psicoanálisis es un recurso imprescindible para profundizar en el estudio de los mecanismos de defensa individuales y comunitarios que impiden la toma de conciencia plena y madura acerca de la grave crisis ambiental. Ante la evidencia objetiva de los daños ocasionados pero también de los que potencialmente podemos causar, aun a sabiendas de su magnitud y peligrosidad, nos resulta difícil tomar consciencia emocionalmente, más que cognitivamente, de lo que sucedió, de lo que está sucediendo y lo que aún puede suceder. Resulta imposible hablar de un imaginario individual sin considerar el imaginario colectivo, que lo subyace y lo impregna, en una relación de codeterminación recíproca. Y no podemos confiar en la imagen de un entorno que sea solo un afuera desconectado de la representación que de él tenemos internamente. El libro, que Lorena Preta define como necesario, se propone iluminar las confusas investiduras afectivas y

las angustias que sostienen defensas patológicas como la proyección, la represión, la intelectualización, la escisión, el desplazamiento y la negación, en un entretelado de reflexiones acerca de las historias y las narraciones individuales que cobran vida en el consultorio y el imaginario colectivo.
