Dempster-Shafer evidence theory, also called the theory of belief function, is widely used for uncertainty modeling and reasoning. However, when the size and number of focal elements are large, the evidence combination will bring a high computational complexity. To address this issue, various methods have been proposed including the implementation of more efficient combination rules and the simplifications or approximations of Basic Belief Assignments (BBAs). In this paper, a novel principle for approximating a BBA into a simpler one is proposed, which is based on the degree of non-redundancy for focal elements.

This book will completely transform the standard interpretation of the Young Turk Revolution of 1908, a watershed event in the late Ottoman Empire and a key to the emergence of the modern nation-states in the Middle East and Balkans. Preparation for a Revolution is the first book on the Young Turk Revolution to draw on both the extensive memoirs and papers of the Young Turks and on the extensive diplomatic archives around the world. The author has plumbed not only the Ottoman Archives but collected documents from archives in

Bonn, Berlin, Jerusalem, London, Paris, Rome, Athens, Sofia, Tirana, Bern, Geneva, Sarajevo, Cairo, Stockholm, and Tokyo. Breaking new ground, Hanioglu describes in detail how practical considerations led the Young Turks to sacrifice or alter many of their goals for social transformation. He tells a story rich in character and plot, and reveals the many factions and competing intellectual trends that marked this tumultuous period at the end of the Ottoman Empire. Preparation for a Revolution will prove indispensable to anyone working on the political, intellectual, and social history of the Ottoman Empire and of the states that were established on its ruins. Bestselling author and professor Ted Malloch calls for real financial reform to restore confidence and fairness to a broken system. From Ponzi schemes to the credit crisis to the real estate bubble, the financial industry seems to have lost its way on the road to riches. As private greed continues to undermine the public good, one might wonder what ever happened to business ethics. And how can we reform the global financial system to benefit everyone, rather than just the very lucky few? In *The End of Ethics and the Way Back*, the bestselling author of *Doing Virtuous Business* teams up with attorney and Yale University Postdoctoral Fellow, Jordan Mamorsky to examine the most recent failures of business virtue, prudence, and governance—from Bernie Madoff to Jon Corzine and MF Global—before offering a set of structural and holistic solutions for our current ethical crisis in global finance. Features compelling case studies that reveal the saturation of economic vice in global finance. Suggests structural reforms to the global financial system that would increase confidence among consumers and encourage ethical behavior among finance professionals. Written by Ted Malloch, author of the bestseller *Doing Virtuous Business* with attorney Jordan Mamorsky. Ideal for financial regulators, business students and academics, and professionals in the finance industry. The Routledge Introductory Course in Moroccan Arabic is ideal for both class-based and independent learners. No prior knowledge of Arabic is required as the course guides you step-by-step through the essentials of the language. Transliteration is used throughout to provide learners with an accurate representation of this spoken language while Arabic script is provided from Part II for those who have prior knowledge of Arabic. Part I introduces the phonology of Moroccan allowing you to recognise and pronounce the sounds unique to Moroccan. The basic grammar of Moroccan is also presented here ensuring students have a solid foundation on which to build their communicative skills. Part II is arranged thematically and equips you with the vocabulary and cultural information needed to communicate effectively in Morocco in a range of common situations. By the end of the course learners will have reached the CEFR A2 level/ACTFL Intermediate-Mid. Written to be used in conjunction with, not instead of the "Big Book of Alcoholics anonymous." This book will help guide you through a personal experience with all "Twelve

Steps" as they are outlined in the "AA Big Book." You write notes and questions from the "Big Book Awakening" into your own "Big Book" for personal consideration. After you have completed this process yourself your "Big Book" is now a powerful "working with others book" with questions and considerations that will help you work with others both one-on-one and in workshops. They then themselves write the same notes into their own "Big Book" to one day do the same. The new edition of this highly successful and popular textbook is a comprehensive, easy-to-follow guide to using and interpreting all the quantitative techniques that students will encounter in their later business and financial careers; from fundamental principles through to more advanced applications. Topics are explained in a clear, friendly step-by-step style, accompanied by examples, exercises and activities, making the text ideal for self-tuition or for the student with no experience or confidence in working with numbers. This highly successful learning-by-doing approach, coupled with the book's clear structure, will enable even the most maths-phobic student to understand these essential mathematical skills. Comprehensive in both its scope of coverage and the range of abilities it caters for, this remains a core textbook for undergraduate students of business, management and finance, for whom Quantitative Methods modules will be a key component. It will also appeal to those on related MBA and postgraduate courses. New to this Edition: - Business Modelling 'Moving on...' feature with integrated web and book activities to promote student engagement with the application of mathematical techniques in real-life workplaces - Extensive revamp of two Statistics chapters based on student and lecturer feedback - Crucial updated practical guides to using Excel and SPSS - Integrated companion website resources helps relate theory to real world examples This Book Is Aimed At Providing An Introduction To The Basic Models Of Computability To The Undergraduate Students. This Book Is Devoted To Finite Automata And Their Properties. Pushdown Automata Provides A Class Of Models And Enables The Analysis Of Context-Free Languages. Turing Machines Have Been Introduced And The Book Discusses Computability And Decidability. A Number Of Problems With Solutions Have Been Provided For Each Chapter. A Lot Of Exercises Have Been Given With Hints/Answers To Most Of These Tutorial Problems. The conference topics address different theoretical and practical aspects, and implementing solutions for intelligent systems and informatics disciplines including bioinformatics, computer science, medical informatics, biology, social studies, as well as robotics research. The conference also discuss and present solutions to the cloud computing and big data mining which are considered hot research topics. The conference papers discussed different topics – techniques, models, methods, architectures, as well as multi aspect, domain-specific, and new solutions for the above disciplines. The accepted papers have been grouped into five parts: Part I—Intelligent Systems and Informatics, addressing topics including, but not limited to, medical application, predicting student performance, action classification, and detection of dead stained microscopic cells, optical character recognition, plant identification, rehabilitation of disabled people. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde." This compact and student-friendly book presents the fundamental concepts of accounting. It brilliantly combines two areas of accounting—financial accounting and corporate accounting. While the initial and middle chapters give a clear analysis of financial accounting, the remaining chapters provide a succinct account of corporate accounting. The chapters on financial accounting discuss in detail the concepts of accounting and accounting standards, the process and technique of accounting, source documents and vouchers for recording of transactions. Besides, they deal with the rules of debit and credit, and journal entry and preparation of trial balance as well as errors and their rectification. Finally, these chapters cover the concept and causes of depreciation and methods of recording and providing depreciation, the adjustment required to prepare the final accounts of a trader including the accounting concepts of income and its measurements, and the meaning, objectives and methods of valuation of inventories. Chapters on corporate accounting discuss in detail the issue of shares, forfeiture and reissue of forfeited shares, and issue and redemption of debentures. In addition, they show how the final accounts of a company are prepared as per Schedule VI of the Indian Companies Act, 1956. This well-organized and student-friendly book is intended as a text for the undergraduate students of management (BBA). Besides, anyone who wishes to know about the fundamentals of financial and corporate accounting will find the book extremely useful. Key Features Provides 400 solved problems to illustrate the concepts discussed. Includes 300 unsolved problems for practice. Contains a variety of end-of-chapter questions. No developed nation relies exclusively on the private sector to finance health care for citizens. This book begins by exploring the deficiencies in private health insurance that account for this. It then recounts the history and examines the legal character of America's public health care entitlements - Medicare, Medicaid, and tax subsidies for employment-related health benefits. These programs are increasingly embattled, attacked by those advocating privatization (replacing public with private insurance); individualization (replacing group and community-based insurance with approaches based on individual choice within markets); and devolution (devolving authority over entitlements to state governments and to private entities). Jost critically analyzes this movement toward disentanglement. He also examines the primary models for structuring health care entitlements in other countries - general taxation-funded national health insurance and social insurance - and considers what we can learn from these models. The book concludes by describing what an American entitlement-based health care system could look like, and in particular how the legal characteristics of our entitlement programs could be structured to support the long-term sustainability of these vital programs.
