The Mind of Whitehead Dec 15 2019 If one believes the French philosopher Gilles Deleuze, Alfred North Whitehead's work is one of the most important events in the exploration of the universes of thought in recent times. Whitehead's text confronts us with the feeling of existing in a world that cannot be defined by any creed or method, but offers us unexpected friends: ideas—ideas that unleash and alleviate, play and mitigate despair, swim in the rough waters, but without effort let go of us if we cannot fathom them. For adventurers who risk the encounter with Whitehead's text, its treasures feel like balm on the overheated, burning sensation of wounds of division. A way out. A new way. A revolution—not of violent overturning, but of gentle reorientation in which compassionate thinking breathes. It is not about systems, but permeated with musical rhythms and harmonics, composing significance with impermanence. It does not arrive at a promised land, but perhaps is a harbinger of

things to come, sensing a universe that will surprise our descendants. It does not reveal a mind in which we can live, but one that challenges all rest.
Can Scorpions Smoke? Creative Adventures in the Corporate World Aug 03 2021 Imagination, creativity, improvisation and play are not words that adults normally associate with their work, but many secretly lament their absence in everyday life. They are also words that many of us wouldn't put at the top of our curriculum vitae either. However, the world is changing and the emergence of an Age of Applied Artistry is calling for modern organisations to take the development of these skills more seriously, as they become capabilities that are not just nice-to-have but essential for survival in the corporate world of the future. This book crashes together ideas from the world of Organisation Development (OD), gestalt psychology and improvisational theatre and distils them into some simple stories, concepts and practices that anybody and everybody can experiment with in order to awaken and unleash their own creative spirit. It is an unusual, entertaining and insightful mix of biography and field guide that helps defrost the little creative genius inside of us all.

Cognizant of many U.S. schools' limited budgets and time, Hobert advocates teaching foreign languages early in life, honing students' conflict-resolution skills, providing creative-service learning opportunities, and offering cultural-exchange possibilities in students' own communities, as well as nationally and abroad—all before they graduate from high school.
