Mixed Signals-Liz Curtis Higgs 2011-03-23 Love Is on the Air Belle O'Brien, the woman behind the warmest voice in Virginia radio, has one problem: Her oldies show on WPER-FM is a solid-gold hit, but her love life, at thirty-two years and counting, is an off-the-charts disaster. The pickings are slim in small-town Abingdon. Will it be smooth-talking Patrick Reese, the man who launched her radio career a decade earlier? Moody but handsome David Cahill, the chief engineer with a mysterious past and a new life in Christ? Or Matthew the Methodist, her pastor

across the street? Surrounded by an on-air cast of colorful characters, Belle's journey toward joy is filled with humor, heartache, and endless surprises. Norah Silver-Smyth, her friend and encourager, will join Belle in discovering that it's never too late to listen to your heart. "One of the most delightful surprises I've had all year— a first novel that moved me to both laughter and tears!" Susan Wiggs, USA Today bestselling author Love Is on the Air Belle O'Brien, the woman behind the warmest voice in Virginia radio, has a problem: Her oldies show is a solid-gold hit, but her love life is an off-the-charts disaster. Her prospects for a husband are small-town slim. Will it be smooth-talking Patrick Reese, who launched her radio career? Moody but handsome David Cahill, WPER's enigmatic broadcast engineer? Matthew the Methodist, her oh-so-available pastor? Or the mysterious radio listener who signs his letters, "All Ears in Abingdon"? As Belle embarks on a journey toward joy, Norah Silver-Smyth, proprietor of The Silver Spoon, cooks up her own delicious recipe for happily-ever-after in this winsome tale

filled with humor, tenderness, endless surprises...and two happy endings! "Liz Curtis Higgs...has succeeded magnificently with her first fictional effort." K-LOVE News & Reviews "Christian fiction isn't known for humorous books, so this title is a special joy." Library Journal "Great laughs, good solid story, surprises and twists, and great characters." Francine Rivers, bestselling author of Redeeming Love "Absolutely wonderful. An outstanding and heart-warming debut!" Angela Elwell Hunt, author of The Note "Mixed Signals was my sweet reward at the end of my demanding days...a most satisfying treat!" Jane Johnson Struck, Senior Editor, Today's Christian Woman Story Behind the Book Before she became a platform speaker, Liz Curtis Higgs spent ten years as a successful radio personality, moving town to town, up and down the dial. In Mixed Signals, Liz draws on that memorable decade to create WPER, an oldies station in Abingdon, Virginia. The Barter Theater was included with thanks to her experience with amateur drama productions, and the ten hot-air balloon ascents she weathered

while a broadcaster were also put to use. Her heroine, Belle, marries a radio station engineer...just as Liz did nearly twenty years ago. But there the parallels end in this winsome tale with two happy endings.

Mountain Time-Ivan Doig 2013-07-09 At fifty-something, environmental reporter Mitch Rozier has grown estranged from Seattle's coffee shop and cyber culture. His newspaper is going under, and his relationship with Lexa McCaskill is stalled at "just living together." Then, he is summoned by his sly, exasperating father, Lyle, back to the family land, which Lyle plans to sell in the latest of his get-rich schemes before dying. Lexa follows, accompanied by her sister Mariah, and the stage is set for long-overdue confrontations -- between lovers, sisters, and father and son. Mountain Time is distinguished by humor and a wry insight into the power of family feuds to mark individuals and endure. Set against the glorious backdrop of Montana mountain country, it is a dazzling novel of love,

family, and the contemporary West.

Moments, Monodromy, and Perversity-

Nicholas M. Katz 2005-10-02 It is now some thirty years since Deligne first proved his general equidistribution theorem, thus establishing the fundamental result governing the statistical properties of suitably "pure" algebro-geometric

families of character sums over finite fields (and of their associated L-functions). Roughly speaking, Deligne showed that any such family obeys a "generalized Sato-Tate law," and that figuring out which generalized Sato-Tate law applies to a given family amounts essentially to computing a certain complex semisimple (not necessarily connected) algebraic group, the "geometric monodromy group" attached to that family. Up to now, nearly all techniques for determining geometric monodromy groups have relied, at least in part, on local information. In *Moments, Monodromy, and Perversity*, Nicholas Katz develops new techniques, which are resolutely global in nature. They are based on two vital ingredients, neither of which existed at the time of Deligne's original work on the subject. The first is the theory of perverse sheaves, pioneered by Goresky and MacPherson in the topological setting and then brilliantly transposed to algebraic geometry by Beilinson, Bernstein, Deligne, and Gabber. The second is Larsen's Alternative, which very nearly characterizes classical groups by their fourth

moments. These new techniques, which are of great interest in their own right, are first developed and then used to calculate the geometric monodromy groups attached to some quite specific universal families of (L-functions attached to) character sums over finite fields.

Computer Vision - ECCV 2004-Tomas Pajdla
2004-05-10 Welcome to the proceedings of the 8th European Conference on Computer - sion! Following a very successful ECCV 2002, the response to our call for papers was almost equally strong - 555 papers were submitted. We accepted 41 papers for oral and 149 papers for poster presentation. Several innovations were introduced into the review process. First, the number of program committee members was increased to reduce their review load. We managed to assign to program committee members no more than 12 papers. Second, we adopted a paper ranking system. Program committee members were asked to rank all the papers assigned to them, even those that were

reviewed by additional reviewers. Third, we allowed authors to respond to the reviews consolidated in a discussion involving the area chair and the reviewers. Fourth, thereports,thereviews,andtheresponsesweremadeavailabletotheauthorsas well as to the program committee members. Our aim was to provide the authors with maximal feedback and to let the program committee members know how authors reacted to their reviews and how their reviews were or were not re?ected in the ?nal decision. Finally, we reduced the length of reviewed papers from 15 to 12 pages. ThepreparationofECCV2004wentsmoothlythankstothee?ortsofthe- ganizing committee, the area chairs, the program committee, and the reviewers. We are indebted to Anders Heyden, Mads Nielsen, and Henrik J. Nielsen for passing on ECCV traditions and to Dominique Asselineau from ENST/TSI who kindly provided his GestRFIA conference software. We thank Jan-Olof Eklundh and Andrew Zisserman for encouraging us to organize ECCV 2004 in Prague.

Athletes' Careers Across Cultures-Natalia B. Stambulova 2013-06-07 Athletes' Careers Across Cultures is the first book of its kind to bring together a truly global spread of leading sports psychology career researchers and practitioners into one comprehensive resource. This extensive volume traces the evolution of athlete career research through a cultural lens and maps the complex topography of athletes' careers across national boundaries exploring how social and cultural discourses shape their development. The area of athlete career development has traditionally been dominated by a Western perspective, an imbalance which has had a considerable influence on the shaping of career studies more generally. Stambulova and Ryba adopt a more culturally sensitive approach, offering a comprehensive analytical review of athlete career research and assistance in 19 different nations. The authors employ diverse theoretical, methodological and practical ideas to demonstrate how local knowledge enables a

better understanding of the dynamics of cultural diversity within the field. Athletes' Careers Across Cultures considers the 'cultural praxis' of athletes' careers as a practical implication of the cultural turn. As such it will stimulate the development of culturally situated career research and assistance and be an invaluable and internationally relevant resource for academics, professionals and students working in sport and exercise psychology.

Since winning a landslide election victory in 2001, Prime Minister Thaksin has exercised an extraordinary degree of personal dominance over the Thai political scene. 1971-Sarah Shaw 2015 This is the diary 19-year-old Sarah Shaw kept in 1971 while she was working in her first job as a BBC secretary in the old Langham building in London. It describes her life in the office, at home and at a hostel in Victoria, growing up at a time when 1960s permissiveness challenged 1950s values. But most of all, it's the story of an extraordinary romance between Sarah and an engaging Irishman much older than herself. "I defy any reader, male or female, not to fall in love with this book. There's a wealth of observation and detail that will have you either exclaiming in recognition (if this is your period) or gobsmacked (if it's not). But it's the May/September romance that is the delightful heart of this book, and which Sarah Shaw renders with enormous tenderness and humour. It's a rare writer who can convey both innocence and knowingness

without spoiling either. What a find!"" (Sarah Harrison <http://www.sarah-harrison.net/>)

Uninterruptible Power Supplies and Active Filters-Ali Emadi 2017-12-19 As industry power demands become increasingly sensitive, power quality distortion becomes a critical issue. The recent increase in nonlinear loads drawing non-sinusoidal currents has seen the introduction of various tools to manage the clean delivery of power. Power demands of medical facilities, data storage and information systems, emergency equipment, etc. require uninterrupted, high

quality power. Uninterruptible power supplies (UPS) and active filters provide this delivery. The first to treat these power management tools together in a comprehensive discussion, *Uninterruptible Power Supplies and Active Filters* compares the similarities of UPS, active filters, and unified power quality conditioners. The book features a description of low-cost and reduced-parts configurations presented for the first time in any publication, along with a presentation of advanced digital controllers. These configurations are vital as industries seek to reduce the cost of power management in their operations. As this field of power management technology continues to grow, industry and academia will come to rely upon the comprehensive treatment found within this book. Industrial engineers in power quality, circuits and devices, and aerospace engineers as well as graduate students will find this a complete and insightful resource for studying and applying the tools of this rapidly developing field.

The book introduces readers to the most popular sampling plans, including Military Standards and civilian ISO and ANSI/ASQC/BS standards. It covers the design, choice and performance evaluation of different types of plans, including single- and double-stage plans, rectifying and non-rectifying plans, plans for pass/fail and continuous measurements, continuous sampling plans, and more. Practical Acceptance Sampling is suitable for courses on quality control and for quality practitioners with basic knowledge of statistics. It offers clear explanations, examples, end-of-chapter problems, and illustrations of state-of-the-art online resources. Methods are illustrated using Microsoft Excel, online calculators, and

SQCOOnline.com. However, any statistical software can be used with the book.
